BHUSHAN VEDPATHAK

ABOUT ME

Senior Front-End Developer with 5 years' experience in React, Angular, and Vue.js. Built 55+ web apps with a focus on scalable, responsive design, performance, and clean code. Strong team player delivering quality results on time.

Skills

- React Js
- Angular Js
- Vue Js
- Redux
- Webpacks
- JavaScript
- RESTful APIs
- Storybook
- jQuery
- Css/SASS
- Bootstrap/Tailwind/Bulma/Vuero
- WordPress/Shopify
- Figma/Photoshop/Zeplin
- Client Handling

EDUCATION

B.Sc (Information Technology)
Dr. Ambedkar College,
2017 – 2020

SENIOR FRONT-END DEVELOPER

6th August 1998

Mumbai/Pune

EXPERIENCE

SENIOR FRONTEND DEVELOPER

CreativeWebo PVT LTD - August 2020 to April 2023

Worked as a Senior Front-End Developer, building high-quality, responsive web applications. Skilled in HTML5, CSS3, JavaScript, and React.js, with a focus on performance and seamless user experience.

UI DEVELOPER

V2Solution PVT LTD - MAY 2023 to DEC 2024

Worked as a UI Developer focused on building reusable Vue.js components and user-friendly dashboards. Maintained Vue Storybook components for cross-project consistency. Skilled in HTML5, CSS3, and JavaScript, with an emphasis on responsive design and smooth user interactions. Also contributed to resolving critical bugs and improving application performance.

INSTRUCTIONAL DESIGNER

Infobeans PVT LTD - JAN 2025 to PRESENT

Responsible for building and maintaining scalable, high-performance web applications using React and modern JavaScript. The role includes designing reusable component architectures, making frontend technical decisions, collaborating with cross-functional teams, ensuring code quality and performance, and mentoring developers while following best practices.

About My self

As a results-driven **Senior React.js Developer with 5+ years of experience**, I specialize in solving complex frontend challenges, optimizing performance, and eliminating critical production issues to deliver scalable, high-quality web applications. I translate business and client requirements into clean, maintainable React solutions, working closely with UX/UI teams to build pixel-perfect, responsive, and high-performance interfaces.

I have led cross-functional teams of 5–6 developers, consistently delivering projects ahead of schedule while mentoring junior engineers to improve code quality, debugging skills, and overall productivity. My contributions have been recognized with multiple organizational awards and direct client appreciation for driving impactful results. With a strong focus on performance, usability, and best practices, I consistently deliver React applications that exceed expectations.

Madhavbaug: Responsibility and Project Duration

As a Senior Frontend Developer, I was responsible for the end-to-end design, architecture, and development of the Madhavbaug Heart Health Score tool available on the Heart Health Meter platform. This user-centric application calculates an individual's heart health score based on key risk factors such as diabetes, excess weight, smoking, high blood pressure, and high cholesterol, while also delivering personalized, actionable recommendations to help manage these risks effectively.

Responsibilities Included:

End-to-End Frontend Development:

Led the complete frontend development from scratch using React.js, defining scalable architecture and reusable components to deliver a seamless and intuitive user experience.

Implemented dynamic data handling and visual representation of heart health metrics to improve clarity and user engagement.

Feature Implementation:

Developed interactive and form-driven components to capture user inputs and display personalized heart health scores in real time.

Integrated business logic to generate customized health recommendations based on calculated scores.

Performance Optimization:

Ensured smooth and efficient performance across devices by applying frontend best practices, including lazy loading, optimized component rendering, and Redux-based state management.

Responsive Design:

Delivered a fully responsive and cross-browser compatible UI, ensuring consistent functionality across mobile, tablet, and desktop devices.

Collaboration and Testing:

Collaborated closely with stakeholders and domain experts to finalize requirements and align technical solutions with business goals.

Performed thorough testing and bug fixes to ensure high-quality, production-ready delivery.

Project Duration:

The project was completed within a 4-month timeline, during which I independently managed frontend design and development, ensuring timely delivery while meeting all functional and performance requirements.
